13. ABSTRACT (Maximum 200 words) The U.S. Army Environmental Center tasked the Mandatory Center of Expertise for the Curation and Management of Archaeological Collections (MCX) with the job of assisting the Army in complying with the Native American Graves Protection and Repatriation Act (NAGPRA), P.L. 101-601. The MCX was asked to locate and assess archaeological collections derived from Army lands, to identify the Native American or Native Hawaiian organizations culturally affiliated with the collections, and to draft Section 6 summary letters for each installation. A two-stage process was used to identify, locate and assess the contents of the collections, consisting of archival research and telephone interviews with the repository personnel. This report conveys the results of the collection research completed for the compliance with Section 6 of NAGPRA

RESEARCH RESULTS

ARCHAEOLOGICAL INVESTIGATIONS AT FORT DEVENS

Archaeological work at Fort Devens began in 1979, however, it appears no artifacts were collected until 1990. Since 1990, two groups have performed archaeological investigations that included collecting artifacts. These organizations are:

Office of Public Archaeology, Boston University, and

The Public Archaeology Laboratory, Inc. (PAL), Pawtucket, Rhode Island.

Investigations consisted of systematic surveys and testing. Artifacts recovered include prehistoric lithics and ceramics, and historic glass, ceramics, metal, animal bone, charcoal, and architectural debris.

It appears that small amounts of archaeological material have also been collected from Fort Devens by a private collector in the area and by Fort Devens personnel. However, the location of material collected by these individuals could not be ascertained with any degree of certainty, and thus will not be included in this report.

SUMMARY OF ARCHAEOLOGICAL COLLECTIONS

A total of approximately 8,705 artifacts have been identified for Fort Devens. As of the date of this report, the collections and associated documentation are located in the following two repositories:

PAL, Pawtucket, Rhode Island

Office of Public Archaeology, Boston University

The attached *Summary of Current Locations of Archaeological Collections from Fort Devens* (Appendix I) provides detailed information about each collection derived as a result of archaeological investigations at the installation. Additionally, a catalogue of collections currently held by PAL has been included (Appendix II). A collection consists of all of the materials,

artifacts, and associated documentation (e.g., field notes, maps, photos, data analyses, correspondence) produced as a result of an archaeological investigation or project at a single site or multiple sites. In some cases, the same archaeological site may have been investigated by various individuals or organizations. Depending on where the resulting collections are curated, they may be stored and identified as separate collections or separate components of a single collection. In cases where the artifacts and records have become separated, we list the records collections repository as well.

Every attempt has been made to locate all collections cited on available archaeological site records or in published and unpublished references to archaeological investigations on the installation.

REFERENCES TO ARCHAEOLOGICAL INVESTIGATIONS

Three sets of references regarding archaeological work conducted on Fort Devens are attached: Appendix III contains the list of references reviewed by the MCX during its archival research; Appendix IV is the list of references contained in the National Archeological Data Base (NADB); and Appendix V provides references cited in the literature but not reviewed by MCX.

NATIVE AMERICAN TRIBES ASSOCIATED WITH FORT DEVENS

According to Glover and Boire (1993:62), at the time of European contact the Nipmuc inhabited the area now occupied by Fort Devens, and the Western Abenaki inhabited the area to the north and northwest. Salwen's map of tribal territories in southern New England circa 1630 depicts the Nashaway, a subgroup of the Nipmuc, as located in the area of the Fort's lands (1978:161).

No land claims were adjudicated for the Fort Devens area in the 1978 Indian Land Claims cases (U.S.G.S. n.d.). No federally recognized tribes claim the area. The state of Massachusetts recognizes the Nipmuc-Hassanamisco tribe and they are currently pursuing federal recognition.

SECTION 6 COMPLIANCE

P.L. 101-601 (NAGPRA) requires that federal agencies engage in active consultation with Native Americans with federally recognized tribes and/or lineal descendants who may be culturally affiliated with the archaeological collections from the installation. Neither of the tribes referenced above has been federally recognized at this time.

APPENDIX I

SUMMARY OF CURRENT LOCATIONS OF ARCHAEOLOGICAL COLLECTIONS FROM FORT DEVENS, MASSACHUSETTS

All collections information has been entered into a Paradox data base file and can be queried by any of the fields listed below, as well as by the name of the installation and by MACOM. The data base will be delivered by the MCX to the U.S. Army Environmental Center upon completion of the U.S. Army NAGPRA Compliance Project. Inquiries for additional information are welcome (MCX: 314-331-8865; U.S. Army Environmental Center NAGPRA Compliance Project: 410-671-1573). The data fields listed in the summary of collections contain the following information:

REPOSITORY:	The current location in which the collection is stored, as of the date of this report.
REPOSITORY POC:	The person contacted by the MCX, or the person to whom inquiries regarding the collection should be addressed.
TELEPHONE:	The telephone number for the repository POC.
COLLECTION ID:	The identifying unit used by the repository to store and/or locate the collection. This can be a unique accession number assigned by the repository, the archaeological site number or project name, the name of the collector of the collection, or another number or name assigned by the repository.
SITE NUMBERS:	The official site number or name only for those sites from which materials were collected. An investigator may have performed work at additional sites but did not collect any materials. Those site numbers are not included in this field.
FIELDWORK DATES:	The date(s) during which the investigation(s) occurred. This information is provided to differentiate between projects that may have investigated the same site repeatedly.
EXCAVATOR/COLLECTOR:	The individual and/or organization that conducted the investigation.

COLLECTION SIZE: The volume or number of objects in a collection, estimated by the repository POC or from project reports.

DESCRIPTION OF MATERIALS: General material classes of the objects in the collection derived from data provided on site records, in references, and/or by the Repository POC.

ANTIQUITY/ARCH. PERIOD: Chronological or cultural-historical designations recorded on site records or in references specific to the collection.

CULTURAL AFFILIATION: This column contains only those ethnic identifications found in the site records or references specific to the collection. This field is left blank if no such information was recorded.

BASIS OF DETERMINATION: Documents the source of the cultural affiliation information (e.g., site record, oral testimony, reference).

SECTION 5 MATERIALS: Describes the number and kind of human skeletal remains and associated funerary objects in the collection, as indicated by the site records, references, repository management documents, or information from repository POC. If these materials are present or are suspected to be present, NAGPRA Section 5 requires a physical inventory of the materials.

APPENDIX II

PAL COLLECTIONS CATALOGUES

Appendix II contains catalogues of collections derived from archaeological work performed at Fort Devens by PAL, which currently curates the majority of archaeological material collected from the fort. Catalogues are included for material collected during PAL's 1993 (pp. 11-41) and 1994-95 surveys (pp. 43-72). Sites are organized by site name or number. This information, obtained from reports produced by PAL (Glover and Boire, 1993; Cherau and Boire, 1995), was provided by the Corps of Engineers, New England Division, Waltham, Massachusetts.

APPENDIX III

MCX LIST OF REFERENCES

In addition to the references reviewed by MCX personnel at the archaeological site information center, every attempt was made to obtain references cited but not on file. Information taken from these references was coded for data relating to collections made from sites located on installation property (see attached sample of PD-C Bibliographic Data Sheet form) and entered into a data base for ease of manipulation.

Report titles were drawn directly from the title page of reports, and consist of the following fields:

FIELD	DATA ENTERED
Subject Property	Army Installation name
Last Name	Primary author's last name
First Name	Primary author's first name
Middle Initial	Primary author's middle initial
Secondary Authors	Names of secondary authors, <i>or</i> in instances where the author is a company rather than an individual, the company name is listed here
Title	Title of the reference. For letter reports, the person or agency to whom the correspondence is addressed is listed as the title.
Series	If the report is part of a publication series, the name and number are provided here.
Date	Date of publication or submission
Length	Report length in pages
Contract Number	Contract number and delivery order number, if applicable

The data for the next three fields are drawn directly from the report title page and reflect the hierarchy of contracting agencies involved in accomplishing the work. In some cases, the sponsoring agency is listed as the Army installation; in others, the intermediary contracting agent, (e.g., the Army Corps of Engineers or the National Park Service) is listed as the Sponsoring Agency.

Sponsoring Agency	Agency for which the report was prepared
Contractor	The agent contracted to perform the work
Subcontractor	The agent subcontracted to perform the work

The majority of the citations for archaeological investigations on Army land refer to unpublished reports prepared under contract with federal agencies, consequently the MCX printout was designed to address these reports. In instances where the author is a company rather than an individual, the company name is listed in the Secondary Authors field (due to the length of the field). For published references, the publisher is listed in the Sponsoring Agency field.

APPENDIX IV

NATIONAL ARCHEOLOGICAL DATA BASE REFERENCES FOR FORT DEVENS, MASSACHUSETTS

No attempt has been made to edit the National Archeological Data Base format or to correct obvious errors.

Hammer, John, Dan Dimicco, Lisa Fagan, and Robert Wallace

1983 An Archaeological Survey at Fort Devens, Massachusetts, and Its Off-Base Facilities.
John Hammer, Albany, NY. Submitted to Us Army, Fort Devens, MA.

Shott, George C., Jr.

1978 Historic Property Survey, Fort Devens, MA 01433. George C. Shott, Jr.. Submitted to
Interagency Archeological Services-Atlanta.

APPENDIX V

OTHER REFERENCES TO FORT DEVENS

Attempts were made to obtain copies of references that were cited in NADB, on the site records, or in other publications but were not viewed at the Massachusetts Historical Commission. From telephone conversations with various persons conversant with the archaeology of Fort Devens, the MCX determined that no new collections are reported in this reference.

Shott, George C., Jr.

1978 Historic Property Survey, Fort Devens, MA. Submitted to Interagency Archaeological Services, Atlanta.
